## LIGHT DUTY RACKING

---

Generally used for light weight and easily bolted and give maximum storage at low prices. Sizes to be made customized and also give proper finish. All the shelves and angles are manufactured with good quality steel Hr & Cr as per ISI tolerance.

## MEDIUM DUTY RACKING

---

In medium duty racking the span of shelves is lengthy & wide and covers maximum space for storage with economical prices. We will provide design and prices according to requirement in multicolor which looks good.

## HEAVY DUTY RACKING

---

- All heavy material to be stacked in heavy duty racks or it can store on pallet also.
- All size to be made customized with best quality of material and design.
- Material stacked on pallet, that pallet can be stacked in pallet racking height wise.

## MODULAR MEZZANINE FLOOR

---

- Mezzanine Floor gives plain area for storage at required height.
- It can be totally bolted and take load as per your customization.
- On top of mezzanine floor, light weight of mezzanine can be put and work on it.
- Office to be made on top of mezzanine floor.
- Storage of light duty racking can be put on top of mezzanine floor.

## MULTI-TIER RACKING

---

- Multi-tier racking provide height wise i.e ground floor, first floor, second floor, to be made with light duty / heavy duty storage.
- In between racks, there is CAT walk for person moving to handle/ stack material on rack etc.
- Multi tier storage system gives 3-4 time increased storage in similar space.

## CANTILEVER RACKING

---

- Generally Cantilever Racks are used for pipe and lengthy items storage
- Size to be made customized and bears a load from 100kg to 2500kg capacity as per requirement.
- The system basically consist of Vertical arm and horizontal beam.

## SUPER MARKET RACKING

---

- Racks generally used in general stores, and displayed for sales in show-room etc.
- We are manufacturing good quality steel and powder coated because it can not damage food items & cloths etc.
- Sizes customized to be made.
- All metal shelving units are interlocking and fit together without nut or bolts.

## **MOBILE COMPACTORS**

---

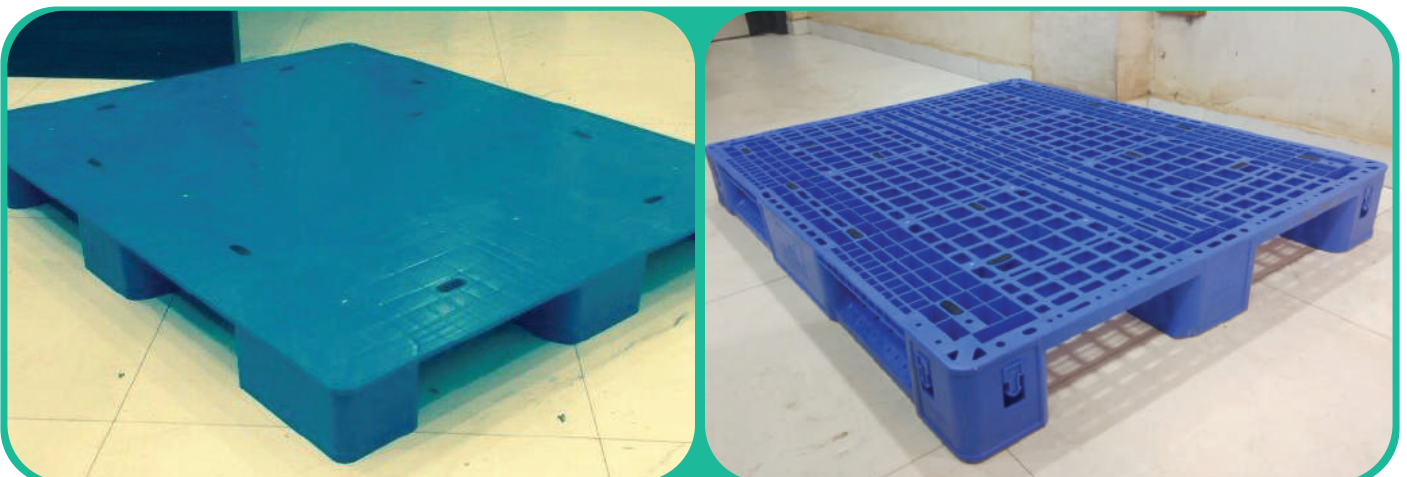

- Mobile compactors mean maximum storage in less space and system can be moved manually and with rails and wheels.
- Maximum storage in less space, only one passage to be left for all racks. Good quality of driving mechanism to be fitted with warranty.

## **PLASTIC PALLETS**

---

- Plastic pallet takes a material and move with pallet truck here and there.
- It can be stack of pallet racking.
- Material can stack on that as per capacity of pallet.
